

**Project Design Phase-II**  
**Solution Requirements (Functional & Non-functional)**

Date	03 October 2022
Team ID	PNT2022TMID18569
Project Name	Project – A Gesture-based Tool for Sterile Browsing Radiology Images
Maximum Marks	4 Marks

**Functional Requirements:**

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Home Page	Displays home page.
FR-2	Introduction Page	Introduction about the hand gesture recognition.
FR-3	Prediction Page	Accept input from the user. Grab frames from the web cam. Predicts the values with the help of opencv.

**Non-functional Requirements:**

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	<b>Usability</b>	Used in doctor-computer interaction devices in the operation room.
NFR-2	<b>Security</b>	IBM Cloud security .
NFR-3	<b>Reliability</b>	This application is a reliable product that produces fast and verified and output of all its processes.
NFR-4	<b>Performance</b>	This application enhances data security, eliminates human errors and increases decision making.
NFR-5	<b>Availability</b>	This application will be available to use and help them to carry out their operations conveniently.
NFR-6	<b>Scalability</b>	One of the approaches to make the gesture recognition system scalable is to make use of cloud-native methods.
